

# T3E

Test, Trials, Training and Evaluation

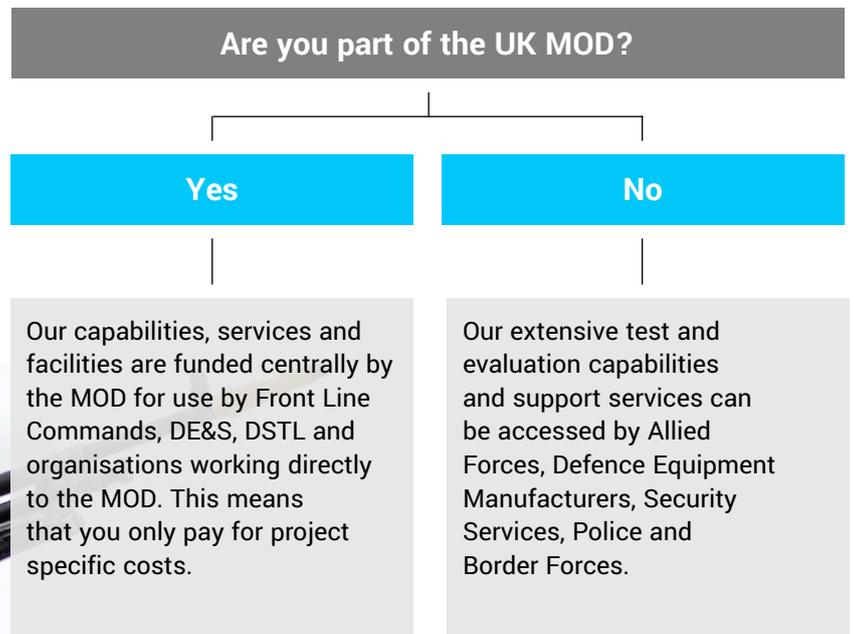

Delivered by QINETIQ for the MOD

## Your guide to working with T3E

T3E delivers Test, Trials, Training and Evaluation through the Long Term Partnering Agreement (LTPA) contract.

Our support services cover the entire test and evaluation process – from planning to analysis. Drawing on our experience, technical expertise and deep knowledge of the specialist facilities across all of our ranges, our team can add value early on in the process by helping you to consider the best approach to securing the outcomes you want to achieve.

### Who can use the T3E services and facilities?

#### Contact

T3Eenquiries@QinetiQ.com or DESWpnsTESTqueries@mod.gov.uk

# We're here to provide end-to-end support for your trial.

When you engage with us, we will take you through a robust tasking process, focused on delivering the outcomes you want to achieve.

## Delivering a proactive and flexible service

We work in an agile way and provide a highly responsive customer focused service. We recognise that our customers' operational schedules and complex defence programmes demand flexibility, and we do our best to accommodate changing priorities.

### Step 1

#### Initial enquiry and scoping

The first step in the process is to provide us with an indication of your requirement, whether that is a specific test event or a bespoke training exercise. You can contact us by email, phone or using the contact form on the [website](#). We will then set up an initial meeting to discuss your requirements and assign a project manager to work with you through each step of the process.

### Step 4

#### Proposal and confirmation

Building on the statement of requirements and trial plan, we will provide a proposal detailing the costs for running your test event, trial or training exercise. Our proposal will also include a schedule for your event. Following review and confirmation of the proposal we will put the plans into action.

### Step 2

#### Statement of requirements

Once we have an understanding of your broad objectives, we will work through the task with you in detail and help you prepare a statement of requirements. This will form the basis of our contract and inform the trial design and planning at the next stage.

### Step 5

#### Trial execution

Throughout the trial we will provide the necessary project management, technical and field management and safety management services to support the successful implementation of your trial. This will include instrumentation of ranges and systems to ensure secure and accurate data capture.

### Step 3

#### Trial design and planning

With the requirements clearly defined, we will support you with the design and planning of your test events, detailing the expert personnel and facilities you will require to meet your specific requirements. This will include advice on the most appropriate sites to run your trial.

### Step 6

#### Test evaluation and data analysis

Our technical experts can support with the analysis of your test and trial data and preparation of recommendations to inform the development of your capability and combat effectiveness.

As an independent organisation, run in partnership between QinetiQ and the UK MOD, you can be assured of impartiality, and the provision of objective analysis and advice.
